## People & Planet First Campaign

Most of us want the same things: a good life for ourselves and our children, a better future that we can look forward to, and to be treated fairly.

But right now, corporations are profiting from damaging our climate and dividing people based on race, background, or where we live, harming our communities—and hurting Black and brown, and indigenous people the most.

That's why the People's Action People & Planet First campaign is focused on:

- A 100% just energy economy
- Green jobs
- Democratizing the energy grid
- An end to sacrifice zones

We aim to localize, enact, and implement a jobs-and-justice forward Green New Deal that decarbonizes the nation by at least 50 percent by 2030.

As a member of the Green New Deal Network, we are working in partnership to build support and commitment to the candidate pledge moving across the country with our allies.
